Vacuum cleaning in animal feed mixing plants with stationary and mobile vacuum systems.

- Suction inlet valves for the connection of flexible hoses in all areas where vacuum cleaning is required.
- Cleaning of mixers, conveyors, filling machines
- Several operators can work at the same time
- Two discharge possibilities for the extracted material:
  - into BigBags for disposal
  - automatic recycling of the product into the production process
- Equipped according to Atex 3D, zone 22 for explosive types of dust.
- High performance dust separation system with pneumatic filter cleaning device according to dust class M or alternatively to dust class H.
